

PLEASE NOTE: Due to museum security, this tour requires registration by 5pm on September 13.

THE GREAT MICHIGAN COMPOST TOUR

Come see the inner workings of the Henry Ford's new **zero waste restaurant!** The restaurant's Harp Aerobic digester can process up to **1200 pounds of food waste a day.** It can turn the compostable serving-ware, meat, and of course, vegetables, into soil in 24 hours. No smelly bins sitting around to attract flies and vermin, and the soil acts as a fertilizer replacement throughout the museum grounds.

Date:
Wednesday,
September 18

Time:
Around 10:00 AM to
12:00 PM

Address:
20900 Oakwood Blvd
Dearborn, MI 48124
